

# HAYITMUROD ESHIMOV

## FRONT END DEVELOPER

About Me:

I am a seasoned React Developer with over four years of experience in building scalable, high-performance web applications. My expertise lies in crafting intuitive user interfaces, optimizing user experience (UX), and writing clean, maintainable code. With a strong foundation in Computer Science, I excel at designing efficient architectures and integrating cutting-edge technologies to enhance performance and usability. I have a deep understanding of smartphone applications, ensuring responsive, mobile-friendly experiences that engage users across devices. My experience spans modern JavaScript frameworks, state management, and seamless backend integration, delivering smooth and accessible web applications.

Technical Skills:

- Frontend Development: React.js, Next.js, TypeScript, Redux, JavaScript (ES6+), CSS3, Sass, TailwindCSS
- User Experience (UX): Responsive Design, Accessibility, Performance Optimization, Mobile-first Design
- Tools & Frameworks: Webpack, Babel, Vite, Jest, React Testing Library
- Backend Integration: REST APIs, GraphQL, Firebase
- Other Skills: Agile Methodologies, Git, Docker, CI/CD Pipelines
- Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Architecture

Key Achievements:

- ✓ Led the development of a React-based SaaS platform, boosting performance by 40%
- ✓ Migrated legacy codebases to React.js, reducing technical debt by 30%
- ✓ Designed & implemented reusable component libraries for large-scale projects
- ✓ Optimized smartphone UI/UX, improving mobile engagement rates
- ✓ Consistently delivered projects ahead of deadlines, achieving a 98% client satisfaction rate

## EDUCATION

Jizakh State of Pedagogical University (Bachelor)

Methodology of teaching physics and astronomy (2016 September – 2020 July)

## PROFESSIONAL EXPERIENCE

Onlinedu  
11/2020 – 03/2022  
Client Side – ReactJS  
onlinedu.uz  
Front End Development

Electronic platform "Continuous Professional Education"

Onlinedu is a platform designed to enhance the skills of Public Education employees through specialized courses. Curated by expert educators, the courses include video lessons, tests, questionnaires, and webinars. Participants earn a certificate of achievement upon completion. The platform also features progress tracking, online chat support, and tools to enrich the learning experience, promoting continuous growth and excellence in public education.

ANET  
11/2022 – 10/2023  
Client Side – VueJS  
go.asakabank.uz  
Front End Development

JSC Asakabank – Document Flow Automation App

The ANET project streamlines document management by enabling users to create, edit, store, and track documents efficiently. It includes features like version control, approval workflows, and access permissions, enhancing collaboration, security, and organization. This system improves productivity and simplifies document handling across departments.

Career Asakabank  
06/2023 – 10/2023  
Server Side & Client Side – NextJS  
career.asakabank.uz  
Front End Development

JSC Asakabank – Career Development Website

This site showcases career opportunities and the work culture at Asakabank Joint Stock Company. Visitors can explore job vacancies, learn about the application process, and gain insights into employee experiences. A dedicated section highlights IT-related roles, while an admin panel ensures easy content management. The platform is a gateway to joining and understanding life at Asakabank.

Prestige Travel  
11/2023 – 12/2023  
Server Side – NextJS  
prestigettravel.uz  
Front End Development

Prestige Travel – Official Website

Prestige Travel is the official website of the Prestige Travel tourism company, providing an easy way to explore destinations and book trips with the company. Visitors can also learn about the company's history, meet its dedicated team, and stay updated with the latest news. It's a one-stop destination for travel planning and company insights.

Dono CRM Asakabank  
12/2023 – 08/2025  
Client Side – ReactJS  
tm.asakabank.uz  
Front End Development

JSC Asakabank – Call Center Automation App

The DONO CRM provides efficient customer support through multiple channels like phone, and live chat. It features advanced analytics to track performance, measure customer satisfaction, and enhance service quality. With a focus on timely responses and professional support, the project aims to improve customer experience and build lasting relationships.

CFO.uz web application  
01/2025 – Present  
Client Side – ReactJS  
cfo.uz  
Front End Development

CFO.uz – Financial management and enterprise resource planning

Led the development of a CFO web application focused on optimizing financial business processes, including budgeting, cashflow management, reporting, and enterprise resource planning. Streamlined workflows and automated key financial operations to improve efficiency, accuracy, and decision-making across the organization.
